Your Opel is an Original...
Keep it that way!

OPEL ORIGINAL EXCHANGE PARTS

LIKE NEW.
FOR LESS.

THE RIGHT OPTION FOR YOU?

Do you drive an Opel?

Need a vehicle repair?

Looking for high quality with excellent value for money?

Want to contribute to protecting the environment?

Opel Original Exchange Parts are the best choice!

WHAT ARE OPEL EXCHANGE PARTS?

Just because parts wear down, does not mean that they are no longer of value. Used Opel Genuine parts are recovered and industrially remanufactured:

These parts are returned to Opel, where they are completely disassembled, inspected for reusability, cleaned and re-worked according to Opel Genuine Parts specifications. Wear and tear components (e.g. gaskets, bearings, seals) affecting the performance or lifetime are fully replaced. This combination of re-worked and new components creates a perfect, like-new Opel Original Exchange Part.

Therefore, Opel Original Exchange Parts can be considered **LIKE NEW. FOR LESS.**

DIFFERS IN PRICE. NOT IN QUALITY.

The Opel Original Exchange Parts Programme may not be the only option in the aftermarket, so why is it the best one?

- High quality guaranteed due to industrialised remanufacturing process, ISO certification and Opel engineering expertise
- Latest technological specifications and modifications according to same standards as new Opel Genuine Parts
- Electronic components are updated with the latest software
- Mechanical parts are fitted with the latest technological improvements
- Complete end-of-line test is conducted to ensure same quality as Opel Genuine Parts

PORTFOLIO.

Opel offers more than 2,500 different remanufactured parts and Parts portfolio to cover a wide range of product groups and vehicles.

continuously extends and updates the Opel Original Exchange For further details, please contact your Opel authorised repairer.
